Disney! Scripts Analysis

This is a collection of Tasks, Ideas, and much more for this Disney Project!!

- Goal: Investigate what makes Disney movies so appealing?

    - Hypothesis:

        - 1) emotional composition — EX: happy→ worrisome→ exciting → triumph → happy

            - across time

            - in general

        - 2) movie stats — how many characters, how long is the movie (by the length of the scripts), how long does specific character talk = how stand out each character/role is

            - can also be how complicated are the grammar or vocabs are in the movies

            - line density

- Tasks: Something needs to be done

    - Uses A, B, C, D to represents priority

    - For Example: 1) A. Fix existing bugs 2) B. Add extra data visualization 3) A. Add more cleaned script data

- Ideas: Random/New/Important Ideas people like

    - There is no limit to what kinds of ideas that can be added here, everything is welcomed to be added here

    - It doesn't matter if it is doable or if more consideration is needed, just throw it up here, again everything is welcomed
